30 January 2014

Dear Mike

**ASSESSMENT OF STATISTICS ON YOUTH JUSTICE FOR ENGLAND AND WALES**

Thank you for the correspondence outlining the actions that have been taken to address the requirements in Assessment Report number 244 Statistics on Youth Justice for England and Wales produced by the Youth Justice Board and Ministry of Justice.

On behalf of the Board of the Statistics Authority, the Assessment Committee has reviewed these on the advice of the Assessment team and I am pleased to confirm the designation of the output as National Statistics. The Authority notes that while you have investigated the needs of users, there has been little response to date. The Authority expects a further update later in 2014 once you have been able to get a fuller set of responses from the user engagement exercise, to include what improvements have been made to your statistics as a result of that engagement.

It is a requirement of the Statistics and Registration Service Act 2007 that compliance with the Code of Practice must be maintained. We would invite you to incorporate the attached text in publications containing the statistics. This text may only be used where National Statistics designation has been awarded following an Assessment Report. It is intended to convey a strong and independent endorsement for the statistical publication.

Please feel free to discuss any aspect of this with us at any time. I am copying this letter to Jill Matheson, the National Statistician, and to Tracie Kilbey.

Yours sincerely

Ed Humpherson

**Text that may only be used in publications that carry the National Statistics logo following assessment and designation:**

The UK Statistics Authority has designated these statistics as National Statistics, in accordance with the Statistics and Registration Service Act 2007 and signifying compliance with the Code of Practice for Official Statistics.

Designation can be broadly interpreted to mean that the statistics:

- meet identified user needs;
- are well explained and readily accessible;
- are produced according to sound methods; and
- are managed impartially and objectively in the public interest.

Once statistics have been designated as National Statistics it is a statutory requirement that the Code of Practice shall continue to be observed.
